

# Keep jobs here and across the country.

GE is a good friend and neighbor around here. We provide high-tech, good-paying jobs for many. These jobs support countless other jobs in our community — in schools, shops, entertainment and manufacturing.

Congress is deciding whether to continue to fund the engine GE has built for America's next generation fighter jet. Without this engine, our competitor will be handed a \$100 billion monopoly for the next 30 years. We don't think this is fair.

Now we are asking for your help in supporting an engine competition, which will save taxpayers as much as \$20 billion.\*

**We urge you to learn more about this critical issue and contact your congressional representative today at [F136.com](http://F136.com).**
